Bowlers World

Price Guide

2007 - 2008

Drilling Charge

AMF Purchased	\$
Conventional Grip	25.00
Semi-Fingertip Grip	50.00
Fingertip Grip	50.00
Extra Grip Holes	8.00

Non AMF Purchased	\$
Conventional Grip	30.00
Semi-Fingertip Grip	60.00
Fingertip Grip	60.00
Extra Grip Holes	10.00

*** Please note that there is a reduced rate for the second drilling where the measurements are already on file. And polyesters attract a cheaper drilling charge than a reactive or particle ball.

Coaching

Patrick Birtig NCAS Level 2 Coach (HP2)

Individual Coaching is available from \$60.00 per hour (free assessment is included—cost is reduced on the second and third session).

Dartfish Video Analysis is used throughout.

Group Coaching is also available (ask for details & cost).

Free Learn to Bowl classes are available (please ask the front counter for details).

All coaching includes lane fees with no extra costs involved.

Advice

All advice is free. Whether you want to purchase a new ball, bag or shoes or if you need advice on the condition of your current equipment, bowling in general, or just want to ask a question. Please feel free to ask and we will be happy to give you the best advice around.

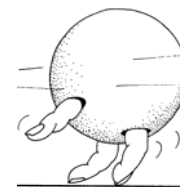

Second-Hand Balls

Pre-owned balls do become available, however this is not something we have often, it's always best to ask just in case there is the odd one available!!

Explanation of Services

DRILLING — All balls at Bowlers World are costed without drilling. For balls purchased elsewhere including any other AMF centre, the customer must pay for drilling. The drilling costs vary depending on the complexity of the fitting & drilling process. In general, a conventional grip takes less time to measure and fit than a fingertip fit. All drillings are guaranteed for fit, and any minor alterations are free.

PLUGGING & REDRILLING — Some balls need to be filled and redrilled to create a more suitable drilling; the process takes around 24—48 hrs. Colour matching is done as close as possible and all care is taken to get it close. All plugging is guaranteed for a period of 6 months under normal conditions.

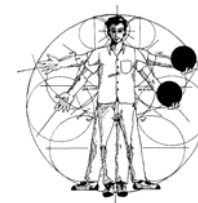

RESURFACING — All bowling balls, at some time, need to be resurfaced. This process takes around 30—45 mins and brings the ball surface back to as close to original condition as possible, therefore creating a better ball reaction. Particle balls can take a little longer to do and therefore have a slightly higher cost. Some types of balls need a resurface after only 100 games, so please ask for a free assessment of your bowling ball's condition.

REVIVOR TREATMENT — The newer types of bowling balls absorb a great deal of oil, therefore a bowler will notice a gradual decline in the ball's performance. The Revivor Unit is specifically designed to extract the oil out of Reactive and Particle balls, rejuvenating them back to as new condition. Again, we will be happy to explain the process a little more for you. The Ebonite Hook Again System takes 24hrs, and is available in some centres.

“All coaching is of the highest standard ...”

POLISHING — Some balls, such as Polyester, take only a short time to polish, whereas some of the Particle balls can take much longer. Our charges reflect how much time is needed to polish the ball.

THUMB INSERTS — You can purchase pre-drilled thumb inserts that are oval, round, tapered, etc., these are easier to fit than solids which have to be drilled and fitted to your individual thumb size, our prices reflect that cost.

THUMB MOULDS — You can now have an exact copy of an existing thumbhole by creating a mould of your favourite thumbhole. We then produce an exact replica of that thumbhole which you can use in another ball. The process of creating the mould takes 24 hrs and we keep the mould for future use for you.

COACHING — All coaching is of the highest standard, individually created to best suit the bowler. Patrick Birtig is a Level 2 HP 2 coach and coach educator, and coaches bowlers of all levels from beginner to the elite representatives of our state & country. Fees for coaching can be variable depending on the amount of coaching required.
